In September of her 5<sup>th</sup> grade year in Middle Township, 11-year-old Ariel Caro was diagnosed with a rare form of pediatric brain cancer called ATRT, Atypical Teratoid Rhabdoid Tumor. Ariel fought the disease and returned to school in 7<sup>th</sup> grade, her beautiful long curly hair gone, her face partially paralyzed, a feeding tube in her nose, and medicine ports in her chest and skull.

Despite the fight that she put up, Ariel died at 6:43AM on November 12<sup>th</sup>, 2018. Ariel was surrounded by family and friends, the things most important to her. Beautiful, dignified, strong, loving Ariel was 15 years old.

Ariel's fear was that she would be forgotten. Her family and friends established this scholarship to keep her name and memory alive.

*...because our hero  
was 15 years old*
