Dear Student and Parents:

September 2017

It gives me great pleasure to present the 2018-2019 Program of Studies. The Content Area Supervisors, Teachers, School Counselors, and Assistant Principals have all collaborated in the development of this resource to ensure that you have all of the required information at hand for program planning and scheduling. High school graduation requirements, as well as information regarding college and career preparatory programs are outlined for you. A four-year planning tool is also included to assist you in the course selection progress. New courses are denoted with an asterisk (*) and are highlighted in red for online viewing. Courses that are eligible for college credit through the CAP program are denoted with the following symbol: §.

The nature of our world and its economy require that students prepare themselves to become informed citizens and contributors to a global society. The program choices you make now will enhance the number of postsecondary training and career options available to you as you further your education beyond high school. Your School Counselor will be an integral partner in assisting you in developing your program plan. **Please read the introductory pages of the guide thoroughly prior to making course selections as many changes have been made this year.** As you are aware, you may select the desired level of courses provided that you have met the prerequisites and have given careful consideration to your current level of performance and teacher recommendations as predictors of your future success in a higher level course. We have also included for you flow charts for your reference. Though the charts are a suggested sequence of courses, students are certainly able to move levels within each course as long as prerequisites have been met. Our science classes only list math prerequisites as the flow charts list the science courses that must be completed before enrolling in the next sequential course.

Once your courses have been selected and verified in early April, there will be NO course changes until schedules are distributed in early August. Please do not schedule any course on a “try-out” basis, thinking that you can simply change it at a later date since there may not be room in other courses and we will not overload classes to accommodate your change. I encourage you to make informed course choices to ensure that you will be able to maintain your desired level change due to a performance issue once the school year has started.

While colleges and universities place great emphasis on taking advanced level courses, it is equally important that you develop a well-rounded program that not only addresses academic rigor, but also enables you to have a balanced, healthy lifestyle. All students at MTHS will be scheduled for eight class periods and one lunch period to refresh, relax and socialize with classmates. Make realistic choices and follow your passion for learning.

It is my sincere hope that you will enjoy the upcoming school year! Please take advantage of all the programs, resources, and supports that we have in place for you.

With Panther Pride and Spirit,

Frank Riggitano
Principal

GRADUATION REQUIREMENTS CHART

Language Arts Literacy	20 credits aligned to grade 9 to 12 standards
Math	15 credits including algebra I content (effective with the 2008-2009 9th grade class), geometry content (effective with the 2010-2011 9th grade class), and a third year of math that builds upon algebra I and geometry and prepares students for college and 21st century careers (effective with the 2012-2013 9th grade class)
Science	15 credits including laboratory biology (effective with the 2008-2009 9th grade class); chemistry, environmental science or physics (effective with the 2010-2011 9th grade class); and an additional lab/inquiry-based science (effective with the 2012-2013 9th grade class)
Social Studies	15 credits including histories and integrated civics, economics, geography, and global content (5 credits World History, 10 credits in United States History)
Health/Physical Education	5 credits for each year of enrollment (must include Health component).
World Language	5 credits or student demonstration of proficiency
Visual,Performing Arts	5 credits
21st Century life and careers or career-technical education	5 credits
Technological Literacy	Consistent with the Core Curriculum Content Standards, integrated throughout the curriculum
Economics	2.5 credits in financial, economic, business and entrepreneurial literacy (effective with the 2010-2011 9th grade class)
Total credits (state minimum)	120

PHILOSOPHY OF MIDDLE TOWNSHIP HIGH SCHOOL

We believe Middle Township High School to be a community of learning whose common purpose is to educate and train its diverse population for a productive life in a complex, ever-changing democratic society.

We are a unique educational community. We enroll children from rural residences, farms, developments, business and government centers, and seashore resorts. We graduate young men and women which constantly creates a community out of its very diverse constituencies. We believe that life and reality are a continuum and that our high school is not merely an interlude in our students' lives that they all must pass through on their way to their futures.

It is within this context that we must offer each child, regardless of background or abilities, the opportunity to acquire the intellectual, physical, and social skills to function in these societies to the fullest of his or her individual potential. Those skills shall be presented through a flexible program of interaction and instruction in basic skills, general knowledge, and cultural appreciation with additional opportunities in career education, economic skills, occupational competency, and preparation for a changing society. The program shall also include health, human relations, family living, civic skills, and self-realization and shall be complemented by all possible student personnel services.

Middle Township High School-its students, staff, teachers, and administrators-shall continue as a community of learning with mutual respect for each and our commitment to the learning process. We believe we are a microcosm of larger communities. As a learning community, we are engaged in passing on the traditions, values and skills of our society and culture. We carry out our mission in an atmosphere that is energized by meeting the needs of our students. The community and the School Board respond to our needs with financial, physical, and moral support. The administration facilitates the learning process, furnishes a secure environment, and provides academic leadership. Our teachers exercise responsible stewardship over the communication of these skills and traditions while our students, hopefully, are willing participants in our mutual search for truth.

Although all elements of education are interrelated, the policies contained herein apply specially to the academic component of the inclusive education provided by Middle Township High School. These policies provide structure and consistency within the academic program.

SCHOOL CURRICULUM

The school's curriculum reflects a traditional approach to education. Emphasis is placed on skills development and the ability to use the skills effectively. There are three basic areas of academic preparation available for students at the high school: college preparatory, advance and Special Needs/Vocational. Cape May County Vocational Technical H.S. provides full-day instruction for vocationally oriented students. A shared time program between Middle Township High School and Cape May County Vocational Technical High School is available for special needs students only.

SCHOOL COUNSELING SERVICES

<http://www.middletp.k12.nj.us>

Purpose & Responsibilities of the Guidance Department

The philosophy of the School Counseling Department at Middle Township High School is based on the premise that each student is an individual and has individual needs, desires, and goals. Students may request an appointment by completing a Request form in the school counseling office. In an emergency situation, the student will be seen immediately.

Honor Roll

Those students who earn all grades of A- or above will be placed on the Distinguished Honor Roll. Those students who earn all grades of B- or above will be placed on the Honor Roll.

National Honor Society

Students who are candidates for the National Honor Society must earn a minimum GPA of 3.3 and meet minimum criteria for service/activity credits (please see the advisor for specific criteria of activity credits.) Potential candidates are notified of their eligibility. They must complete an application and be approved by the screening committee prior to induction. Disciplinary infractions and other conduct issues may impact a student's candidacy for the National Honor Society. Those

students who fail to maintain their GPA and/or conduct standard may be subject to probation or removal from the organization.

Scheduling and Course selection procedures

The most important thing that a student does each year is make course selections for the following year. Serious consideration must be given to this process and teachers, counselors, and parents should all be involved. When it comes to course selection, teachers—who should know the students best—must counsel students to make the right choices. Students must be realistic concerning their choices and should seek the advice of their teachers, counselors, and parents. Primary consideration must be given to the graduation requirements and then to the requirements of the college they would like to attend.

Course selections are made in the early part of the second semester. This means that decisions must be made as much as seven months in advance of the start of a new school year. Course selection is done by the student with the help of his counselor. Lists are printed and returned to the students for them to review with their parents and to make any changes that might be needed or desired.

Every effort is made by the high school staff to help students and parents choose the best program for each student's needs. Results from standardized testing, teacher recommendations, state-mandated guidelines, and common sense all play an important role in this selection procedure.

Schedule Changes

At the end of the school year, students can request a change in level and/or elective selections. Recommendations by the teachers may be revised and changes can be made. This will need to take place by the June 11, 2018.

Level Changes

A change in level of a specific subject may only be made after thorough discussion is held with the student and teacher. In addition, a parent/guardian letter, consenting to the change, will be needed before that change is done. All schedule changes are within the first marking period only.

College and Career Development

Middle Township High school counseling staff meets with all grade levels via small groups and individual meetings to disperse grade appropriate information and to assist with developing individual goals that will help to focus beyond high school. The primary resource to assist students is NAVIANCE (www.connection.naviance.com/MTHS). Students are introduced to this resource during their freshman year and are encouraged to update and explore throughout their high school experience.

Additional resources may include:

- College Admission Representative Meetings
- Computerized Career Search
- Spring College Fair at MTHS
- Scholarship information via “Remind”
- College Information
- Financial Aid Information night

Parent Conferences

Parent Conferences with teachers may be initiated by a student, parent/guardian, teacher or counselor. Parents should call Mrs. Gombar, school counseling secretary, to arrange a conference.

Scholarship Information

All information about local, county, state, and national scholarships is available on the School Counseling Office website and each student’s Naviance account and through “Remind”.

Financial Aid Night

The School Counseling department also hosts an evening meeting in the fall on financial aid for students planning to attend college, trade, business, or technical school. This workshop is open to all parents as well as students. The evening

focuses on completion of the Free Application Federal for Student Aid (FAFSA), Higher Education Student Assistance Authority (HESAA), available grants and scholarships, work study options, and loans.

Transcripts

The School Counseling department maintains accurate and updated transcripts on each student. These transcripts may be sent to a prospective employer, technical school or college at the student's request after a Transcript Release Request Form has been signed. Should you need a transcript sent, please contact the school counseling office

State Testing Requirements Updated August 2017

On August 3, 2016, the State Board of Education approved updated state regulations for the high school graduation assessments requirements in both English language arts (ELA) and mathematics for the Classes of 2016 through 2021, and beyond. These new state regulations (N.J.A.C. 6A:8-5.1) became effective on September 6, 2016.

The Classes of 2018 and 2019 – Students graduating as members of the Classes of 2018 and 2019 can meet graduation assessment requirements through any of these three pathways:

- (1) Achieving passing scores on high-level PARCC assessments;
- (2) Achieving certain scores on alternative assessments such as the SAT, ACT, or Accuplacer; or
- (3) The submission by the district of a student portfolio through the Department's portfolio appeals process.

(Special Education students whose Individualized Education Plans (IEPs) specify an alternative way to demonstrate proficiencies will continue to follow the graduation requirements set forth in their IEPs.)

The Class of 2020 – Students in the Class of 2020 can demonstrate graduation assessment proficiency through the same three pathways as those in the Classes of 2017 through 2019, provided that students in the Class of 2020 take all PARCC assessments associated with the high-school level courses for which they were eligible* and receive valid scores, as of the September 6, 2016 effective date the amendments were adopted by the State Board of Education.

The Class of 2021 and Beyond – Starting with the Class of 2021, students will only have two pathways to meet the high school graduation assessments requirements:

- (1) Pass the ELA 10 and Algebra 1 assessments; or
- (2) The submission by the district of a student portfolio through the Department's portfolio appeals process, assuming the student has taken all PARCC assessments associated with the high-school level courses for which they were eligible* and receives valid scores.

Each school year the NJDOE will determine the proficiency level needed on the assessments to meet the requirements.

It is important to note that our students have always been able to meet graduation requirements through an alternative assessment or pathway to graduation throughout New Jersey's forty-year history with a statewide assessment program, and will continue to be able to do so.

In this document, you will find charts containing the list of assessment requirements in both ELA and mathematics for the high school graduation Classes of 2018 through 2021.

Note: * "Eligible" is defined as a student who is enrolled in a high-school level course for which there is a PARCC test and receives a valid score. This includes all of these courses: Algebra I, Geometry, Algebra II, ELA 9, ELA 10, and ELA 11.

ELA and Math Assessment Requirements for the Class of 2018

<u>Three Pathways Available</u>	<u>English Language Arts (ELA)</u>	<u>Mathematics</u>
<p align="center"><u>First Pathway</u> Take and Pass a PARCC Test</p>	<p>PARCC ELA Grade 9 \geq 750 (Level 4) <i>or</i> PARCC ELA Grade 10 \geq 750 (Level 4) <i>or</i> PARCC ELA Grade 11 \geq 725 (Level 3)</p>	<p>PARCC Algebra I \geq 750 (Level 4) <i>or</i> PARCC Geometry \geq 725 (Level 3) <i>or</i> PARCC Algebra II \geq 725 (Level 3)</p>

ACADEMIC POLICY

Academic policy for Middle Township Schools is established by the Board of Education upon recommendations from the Superintendent. Staff members have numerous opportunities for input including committee and individual recommendations.

GENERAL POLICIES

1. Academic Policy is the responsibility of the Administration and the Guidance Director. Counselors and faculty will have input into its development. All academic questions involving policy and student schedules are to be referred to the Guidance Department. This area is their professional responsibility. The counselors are responsible for each student's schedule and graduation requirements.
2. Since academic requirements and career plans are important aspects of each student's development, it is critical that these policies be consistently applied. Deviation from any policy stated herein can only be recommended by the Guidance Supervisor and/or the Principal and approved by the Superintendent.
3. Any and all appeals relative to academic policy will be made in the following sequence: Counselor, Guidance Supervisor, Principal, Superintendent, Board of Education.

ACADEMIC INTEGRITY

Students are expected to maintain the highest standards of honesty in all phases of school life. Cheating on any exams, tests, quizzes or assignments is a serious offense. **If a student cheats, the teacher must notify the parent, administration and the guidance counselor.** The student will receive a "0" for all work involved in the incident

GENERAL GRADING CRITERIA

- There should be a minimum of three types of assessment components (i.e. tests, quizzes, labs, projects, research assignments, homework, notebook, etc.) with multiple assessments (3 or more) for each component. No component should be greater than 40% of the marking period grade. **Any changes in this area must be approved by Mr. Riggitano.**
- **All grades must be on a scale of 100%.**
- Grade sources (a minimum of 15 per marking period) should be noted (quiz, test, homework, etc.). A numeric grade must be recorded for each assignment.
- Teachers may not allow students to enter data into their grade book or to view any other student's grade progress.

GRADING SYSTEM: The following is the grade reporting system:

We have four marking periods of grades being calculated for a final course average. The numerical grade for each marking period grade is then averaged for the final grade in the course. In order to pass the course, students are required to both pass at least two of the four marking periods **and** to earn at least a 65% average for the year. In the past we averaged the course grade between four marking periods and final benchmark assessments, so that there were five grades being used in the calculations. This meant that students could fail any two of these five and still pass the course. **This is no longer the case: Students must now have passing grades for two out of the four marking periods.**

For GPA calculation purposes, Advanced courses will be weighted by a scale factor of 1.1, Honors courses are weighted with a scale factor of 1.2, and AP courses are weighted with a scale factor of 1.3.

Grade	Average	GPA
A+	98-100	4.5
A	95-97	4.3
A-	92-94	4.0
B+	89-91	3.5
B	86-88	3.3
B-	83-85	3.0
C+	80-82	2.5

C	77-79	2.3
C-	74-76	2.0
D+	71-73	1.5
D	68-70	1.3
D-	65-67	1.0
F	Below 65	0

QUARTERLY BENCHMARK EXAMS: Students will take a Quarterly Benchmark Exam at the end of each marking period.

FINAL GRADE CALCULATION

When converting the marking period grades to a final grade point average (GPA), please use the following information. To calculate final grade earned for a full year course add the GPA of the four marking periods. Multiply that sum by .25.

GPA AVERAGE	GPA POINTS	GRADE EARNED
4.45+	4.5	A+
4.15-4.44	4.3	A
3.75-4.14	4.0	A-
3.45-3.74	3.5	B+
3.15-3.44	3.3	B
2.75-3.14	3.0	B-
2.45-2.74	2.5	C+
2.15-2.44	2.3	C
1.75-2.14	2.0	C-
1.45-1.74	1.5	D+
1.15-1.44	1.3	D
.8-1.14	1.0	D-
0-.79	C	F

INCOMPLETE GRADES

1. An incomplete (I) carries a failing grade until the work is completed. **All incomplete work must be made following the schools policy on make up work missed due to absence or the failing grade will stand.**
2. **Any exceptions to this rule must be approved by the Principal.** It is the responsibility of each teacher to report the necessary information, relative to incomplete assignments and/or grades. It is the teacher’s responsibility to carry out this policy and inform the student and parent ASAP.
3. If a teacher is waiting for makeup work, please assign current grade and complete a *Change of Grade Form* when the makeup work in completed within 15 school days.
4. In the event of incomplete work at the end of the school term, and where said work is completed during the summer months, all work will be retained for documentation purposes and become a part of the student’s official records. This makeup must be completed by September 1st of the next academic school year to ensure proper student placement.
5. In the event of failed courses, students taking approved summer instructional course work must have all work completed by September 1st. The appropriate documentation of the grade earned must be reported to the guidance department to ensure proper student placement and credit. The summer session course grade will become part of the permanent record along with grade earned at Middle Township High School.

COURSE AUDIT

1. Students will be allowed to audit classes with the following provisions: Approval of administration and counselor.
2. Complete all assignments, take all tests, follow all classroom rules, complete make-up work as requested by the teacher, and adhere to the attendance policy of the school. If these provisions are not followed the student will be required to drop the course and he/she will be assigned to a study hall.
3. The student's record will show course and "Audit". No grade will be recorded.
4. Must be carrying at least 30/35 credits, in addition to the audited course.
5. Must be arranged and approved prior to October 1st.
6. Audit will be on space-available basis. A student who is auditing a class may be removed to create room for a regular credit status student.
7. Audit is not intended to provide students a venue for class withdrawal.

REPEATED COURSES

All subjects are included in class rank. A subject that is failed and made up counts as credit attempted twice. A subject that is passed with a low grade and taken again to increase the grade will count as credit attempted once, with the average of the two grades being used for class rankings.

REMEDATION PROCEDURES

1. If a course is failed, it must be successfully completed by repeating the course, by attending and passing summer school, or by certified approved private tutoring. Both grades will appear on the official academic record.
2. If a course is failed, in order to receive credit for **PRIVATE TUTORING**, the following procedures must be adhered to:
 - a) Approval of appropriate department chairperson, Guidance Supervisor, and Principal.
 - b) The tutor must be New Jersey certified in appropriate subject matter and must utilize Middle Township High School's course of study and materials.
 - c) Bi-weekly reports must be submitted to the Guidance Supervisor indicating lesson plans, number of hours of contact, number of hours of assigned independent activities, evaluation of progress, and copies of student's work.
 - d) Upon completion of tutoring, the tutor must submit to the Guidance Supervisor a final evaluation, a grade based on the school's approved grading system, and a copy of the final exam key.
 - e) Credit will be assigned based on the following:
 - a. 7.50 credit course: 90 hours of tutor/student contact
 - b. 5.00 credit course: 60 hours of tutor/student contact
 - f) 2.50 credit course: 30 hours of tutor/student contact
 - g) 1.25 credit course: 15 hours of tutor/student contact
3. All summer work must be completed and results provided to the Guidance Department by September 1st of the next academic school year.

An overview of the various levels of instruction follows:

College Preparatory (CP):

Courses designated as CP are intended for students at grade level in their academic skills. Student ability level will be determined by previous academic achievement and standardized test scores, where available. Students enrolled in courses designated as CP will receive instruction that will prepare them to enter 4 year colleges with open or less competitive enrollment criteria, as well as attend other post-secondary schools or enter the work force.

Advanced (ADV):

Courses designated as ADV are intended for students with strong academic skills at or above grade level. Student ability level will be determined by previous academic achievement and standardized test scores, where available. Students enrolled in courses designated as ADV will receive instruction at a pace and depth that will prepare them to enter 4 year colleges with competitive/very competitive enrollment criteria, as well as attend other post-secondary schools or enter the work force.

Honors (HN):

Courses designated as HN are intended for students who are well above grade level in their academic skills and possess the motivation and desire to extend themselves in terms of workload and expectation. Curriculum is delved into at a deeper level, often requiring students to demonstrate more abstract thinking and problem solving skills. More extensive reading and writing assignments are the norm. Honors courses are weighted at +.50 when calculating a student's GPA. Participation in honors courses is recommended of students seeking to gain entry into highly competitive colleges.

Advanced Placement (AP):

Courses designated as AP expose students to a curriculum approved through the recent AP Audit conducted by The College Board and are taught under guidelines established by this organization. Students enrolled in AP courses will be challenged at the highest level of academic difficulty available in a high school setting. Students have the option to sit for an exam in May of the year in which the course is taken. Colleges will often award credit for success on these examinations as measured by a score of 3, 4 or 5 (depending on the course and the college). AP courses are weighted at +.75 when calculating a student's GPA. Participation in AP Courses is required of students seeking to gain entry to most competitive 4 year colleges.

ENGLISH**GRADUATION REQUIREMENTS****Four Years****ENGLISH I****5 credits**

This course reinforces grammar, writing, vocabulary, and literature/reading skills through a "whole language" approach. The student is provided with an overview of literature reflecting various genres.

ENGLISH II**5 credits**

English II further instructs, reinforces and develops the skills practiced in English I. The study of grammar, writing, literature and reading continues on a higher level.

ENGLISH III**5 credits**

English III is designed to provide the student with an overview of American literature from a chronological perspective as well as to provide the student with basic communication skills that are necessary to succeed in today's society. Emphasis is on reading comprehension, vocabulary recognition, and effective writing.

ENGLISH IV

5 credits

This course is designed to instruct and reinforce the life-long language skills which are essential for understanding and communicating the English language. It continues to broaden students' reading experience with various literary genres including poetry, short story, essay and drama with an increase in vocabulary development through the study of context meaning. The course provides students with a chronological study of British literature.

AP LANGUAGE AND COMPOSITION

5 credits

AP Language and Composition is designed to provide the **11th grade student** who demonstrates a high level of academic achievement and the self-discipline necessary to complete assignments independently. with an overview of American Literature from a chronological perspective. In addition to literature, the course covers grammar, vocabulary and writing, all from an integrated approach. Emphasis is placed on the comprehension, analysis and interpretation of varied literature within a historical framework as it relates to the refinement of language, composition and critical thinking skills. The purpose of the course is to prepare students for the AP Language and Composition examination administered by the College Board in May of each year.

There is an emphasis on a variety of writing tasks and skills that include the planning, writing and revising of sustained essays, including text analyses, reader response to text, comparison and contrast, agreement and disagreement, narration and description.

AP LITERATURE AND COMPOSITION

5 credits

AP Literature and Composition is designed to provide **12th grade student** with an overview of British Literature including various genres such as epic, lyric, and satiric poetry, drama and the novel. Emphasis is placed on the analytical approach to literature as it relates to the refinement of language, composition, and critical thinking skills. This course is designed to instruct and reinforce the life-long language skills which are essential for understanding and communicating in the English language. It is designed for students who plan to attend college with an overview of British literature from a chronological perspective. The study of grammar and composition is integrated with the study of literature. The purpose of the course is to prepare students for the AP Literature and Composition examination administered by the College Board in May of each year.

ESL ENGLISH

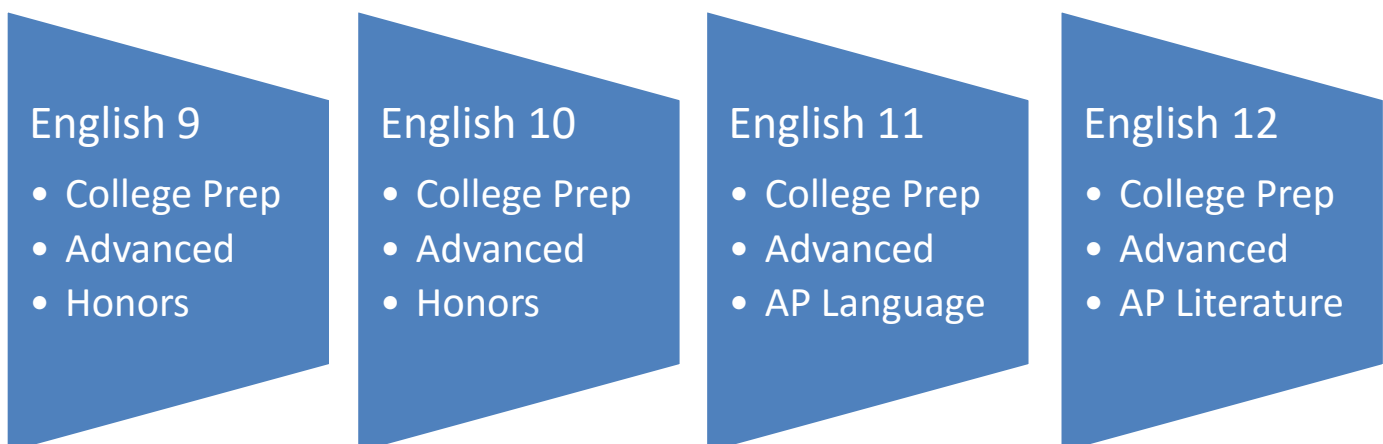

5 credits

The English as a Second Language Program (ESL) teaches students who are non-native speakers to utilize the language effectively and communicate orally, through reading, and by writing. The ESL Program will help students develop these skills quickly in order to prepare them for mainstream classes and a high school diploma. Students engage in listening, speaking, reading, and writing English through an integrated language arts curriculum. Building both on their prior knowledge and on newly introduced material, they prepare for other academic content classes. They become familiar with the culture and structure of an American high school and the community. Placement is made following assessment by the ESL teacher. This course may be used for English credit. This course may be repeated.

ENGLISH/WILSON READING

5 credits

The Wilson Reading System systematically teaches students how to decode and encode the English language. It is based on the multi-sensory language techniques of the Orton-Gillingham approach to reading instruction. The course is designed for classified students in grades 9-12 who experience reading/writing difficulties.

FOREIGN LANGUAGES

FRENCH I

5 credits

French I is a college-prep elective course offered to any 9th through 12th grade student. It is designed to provide students with the necessary vocabulary and grammar to achieve listening, speaking, reading and writing skills indicative of Level I learning. In level one, students will acquire basic communication skills with learned phrases in order to conduct a conversation; form simple questions and answers; provide simple descriptions of people and things; learn simple narration in the present and be introduced to past narration; and be able to provide a simple explanation as to why something is done. Students are introduced to the diversity of the French-speaking world with an emphasis on contemporary French culture.

FRENCH II

5 credits

French II is a college-prep elective course offered to any 9th through 12th grade student who has successfully completed French I. As students progress in French II, they will learn to engage in longer conversations, read and interpret more challenging texts, and understand French-language videos. French II is designed to build upon the students' knowledge acquired in level I with a focus on creative conversation including asking and answering questions; providing more detailed descriptions, including simple comparisons; providing basic narration in the past and future; and expressing personal wishes and needs.

FRENCH III

5 credits

French III is an honors elective course offered to any 10th through 12th grade student who has successfully completed French I and II. Students in French III will focus on conducting extended conversations using complex sentences and pronouns; making more complex comparisons of people, things and actions; providing an extended narration of past, present and future events and corresponding conditions; and expressing emotions, wishes, and hypotheses in complex sentences. The course is designed to prepare students for the reading, writing and speaking skills required in AP French. Students are eligible for dual credit through Atlantic Cape Community College, if they meet all necessary criteria.

AP FRENCH

5 credits

The AP course is offered to any student who has successfully studied a minimum of three years of French and had practice in speaking the language. The AP course in French Language and Culture emphasizes the use of language for active communication and helps students develop the ability to understand spoken French in various contexts. This class will be conducted in French and students will be required to read, comprehend, write and speak using the language. Participants will be asked to engage in both written and oral assignments.

The course is designed to meet the needs of highly motivated students interested in a college-level, intensive language study through language immersion. By stressing reading, writing, speaking and listening, students will work towards proficiency in interpersonal, interpretive and presentational communication. By using the six course themes outlined in the AP curriculum, students will increase their cultural knowledge and experience with the Francophone world through a comparison with their own cultural experience. The AP class will be a challenging and serious course, providing students with the opportunity to truly improve their language skills and the opportunity to take the exam.

SURVEY OF SPANISH

5 credits

Survey of Spanish is designed for the general level student to fulfill the World Language requirement established by the state of New Jersey. This course is independent of Spanish I and is not intended to prepare a student to immediately enter Spanish II. This course will provide students with the necessary vocabulary and grammar, listening and speaking skills for basic understanding of the language. It will also focus on cultural awareness and understanding.

SPANISH I

5 credits

Spanish I is designed to provide students with the necessary vocabulary and grammar to develop skills in listening, speaking, reading and writing indicative of Level I learning. It is also designed to allow the students to become aware of a culture other than own.

SPANISH II

5 credits

Spanish II is an elective course offered to any 9th through 12th grade student who has successfully completed Spanish I. Spanish II is designed to provide students with the necessary vocabulary and grammar to achieve listening, speaking, reading, and writing skills indicative of Level II learning.

SPANISH III

5 credits

Spanish III is an elective course offered to any 10th, 11th or 12th grade student who has successfully completed Spanish I and II. Emphasis is placed on using grammatical structures in context, reading literature, and developing writing style. Students are expected to use Spanish as much as possible in the classroom.

AP SPANISH

5 credits

AP Spanish is an elective course offered to 11th and 12th grade students who, after having successfully completing Spanish I, II and III, want to continue developing their proficiency in all four language skills, including listening, speaking, reading and writing. This course is conducted in Spanish, requiring students to use Spanish nearly all the time in class. The students who take this course are expected to qualify for the Advanced Placement Examination in Spanish Language, which is administered nationally in May.

MATH

GRADUATION REQUIREMENTS: Three Years

15 credits including algebra I content (effective with the 2008-2009 9th grade class), geometry content (effective with the 2010-2011 9th grade class), and a third year of math that builds upon algebra I and geometry and prepares students for college and 21st century careers (effective with the 2012-2013 9th grade class)

TYPICAL SEQUENCES

9 Algebra I

10 Geometry

11 Algebra II

12 Pre-Calculus

ALGEBRA I

5 credits

The course is designed to provide a thorough background in the use of variables to solve equations and inequalities. The typical student is expected to have strong arithmetic skills and a good working knowledge of fractions, decimals, and other basic mathematical concepts. Emphasis is placed on using the arithmetic and algebra skills learned to solve various types of verbal problems. Since this course is a building block for further mathematics, care is taken to stress the basic steps in solving various types of equations and the use of checking answers to ensure success.

GEOMETRY

5 credits

Geometry is a full-year course offered to any student who has successfully completed Algebra I. This course presents a method of logical reasoning and a setting in which to apply the logic. Students are required to apply geometric principles to both theoretical and practical situations. Geometry also deals with trigonometry and its application.

ALGEBRA II

5 credits

Algebra II is a full-year course offered to students who have successfully completed both Algebra I and Geometry. Algebra II courses enable the college preparatory student to further their mathematical ability in the use of variables for solving equations and inequalities. It also continues the emphasis from Algebra I in solving verbal problems. In addition, the course introduces the student to more involved processes of Mathematics such as conic sections, higher degree polynomials, and the methods of solving quadratic equations that do not have perfect square discriminates. The student is also introduced to the Imaginary Number System as another solution set for equations. .

PRE-CALCULUS

5 credits

This course is designed to prepare the student for college-level calculus by covering basic trigonometry and its application, function theory, and complex numbers and graphing. Advanced topics such as analytic geometry, limits and continuity, and introductory calculus are also taught. Upon completion of this course the student may enter a freshman-level calculus course or Advanced Placement Calculus offered in the department.

CALCULUS

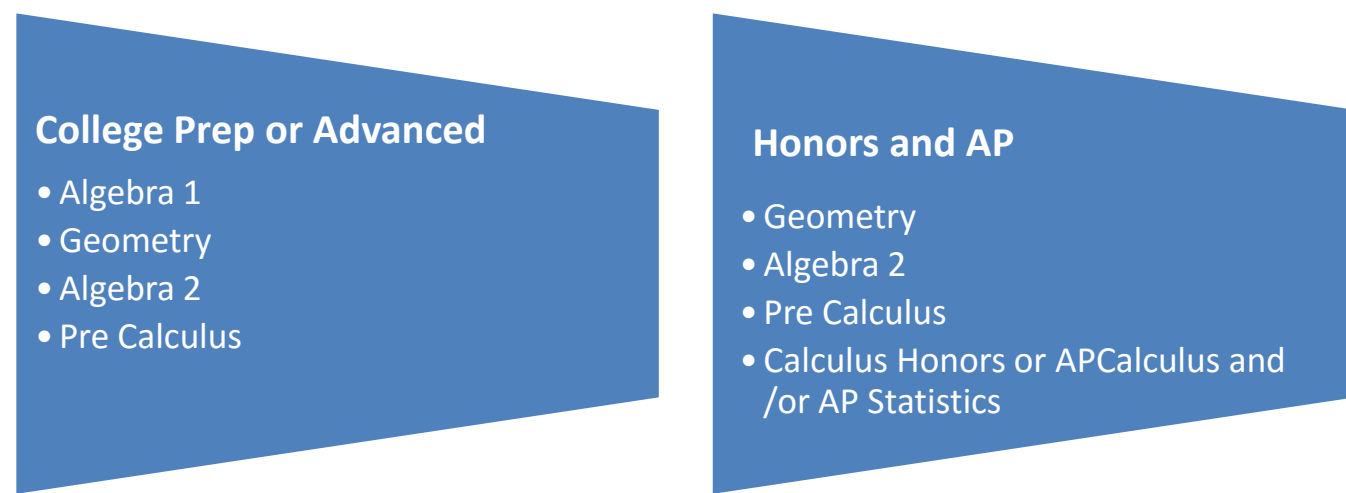

5 credits

This course is open to those mathematically competent college bound students who have successfully completed all of the necessary college prep mathematics courses, including Pre-Calculus with at least a B average and with the recommendation of their current mathematics teacher. Calculus consists of a full year of work in calculus and related topics comparable to at least the first semester of college calculus. The course is designed to prepare the mathematically or scientifically-oriented student for college level mathematics by presenting a discussion of Elementary Function Theory, Differential Calculus and Integral Calculus.

3511 AP STATISTICS

5 Credits

The purpose of the AP course in statistics is to introduce students to the major concepts and tools for collecting, analyzing and drawing conclusions from data. Students are exposed to four broad conceptual themes: Exploring Data: Describing patterns and departures from patterns, Sampling and Experimentation: Planning and conducting a study, Anticipating Patterns: Exploring random phenomena using probability and simulation, and Statistical Inference: Estimating population parameters and testing hypotheses

SCIENCE

GRADUATION REQUIREMENTS:

Three Years

TYPICAL SEQUENCES

9 Biology

10 Chemistry

11 Physics

BIOLOGY

5 credits

Biology is designed to provide a basic background in biology, develop analytical skills, encourage a scientific view point and is a prerequisite for students taking other courses such as chemistry, advanced biology, and physics. Great emphases are put on students' responsibility and work ethic in providing a foundation for these higher level science courses. An experimental research project according to teacher's specification is due in early February.

CHEMISTRY

5 credits

Chemistry is the study of matter and the changes it undergoes. It will require the recall of facts, application of principles, problem solving, and laboratory work. Homework is assigned daily and a notebook must be maintained. C. P. Chemistry prepares students to do well in college requirements in the sciences, pre-medicine, and engineering. Completion of Algebra I is suggested prior to enrollment.

PHYSICS

5 credits

Physics prepares students to do well in college requirements in pre-medicine/dentistry, engineering, and science majors such as chemistry. Students are encouraged to take the Physics Achievement Test in June. Physics emphasizes lab and problem solving. An experimental research project according to the teacher's specifications is due in early February. Prior or concurrent enrollment in Algebra 3/Trig or Pre-Calculus is suggested.

ENVIRONMENTAL SCIENCE

5 credits

Environmental Science focuses on the relation between physical, biological, and earth system sciences in the formation of our environment. Environmental issues are discussed and a decision making model identified to allow students to solve complex scientific problems with a blend of moral, scientific, and social understanding. Evidence based decision making allows students to experience the scientific principles they learn in the classroom and make strong connections between theory and reality. This is lab science course. **Major principles covered include:** matter and energy transformation, atmospheric science, climate and weather, and biogeochemical cycles.

HORTICULTURE

5 credits

A mix of theory and hands-on experiences prepare students who desire to pursue horticulture as a career at the college level or for practical applications around the home. The technique of vegetable gardening, fertilization, composting, seed propagation, asexual propagation, greenhouse structures, greenhouse management, greenhouse plant material, landscape design, and identification of landscape material will be covered. Use of plant material, both interior and exterior, for aesthetic purposes as well as their cultural requirements will be an integral part of this course.

ANATOMY AND PHYSIOLOGY

5 credits

Prerequisite: Chemistry and Biology

This course will include a yearlong program of intense human anatomy and physiology studies. The areas covered will include medical terminology, basic chemistry, cell and tissue structure, and the 11 systems of the human body (integumentary, skeletal, muscular, nervous, endocrine, circulatory, lymphatic, digestive, respiratory, urinary and reproductive).

HOSA

5 credits

HOSA is a national student organization recognized by the U.S. Department of Education and the Health Science Education (HSE) Division of ACTE. HOSA's two-fold mission is to promote career opportunities in the health care industry and to enhance the delivery of quality health care to all people. HOSA's goal is to encourage all health science instructors and students to join and be actively involved in the HSE-HOSA Partnership.

FORENSICS

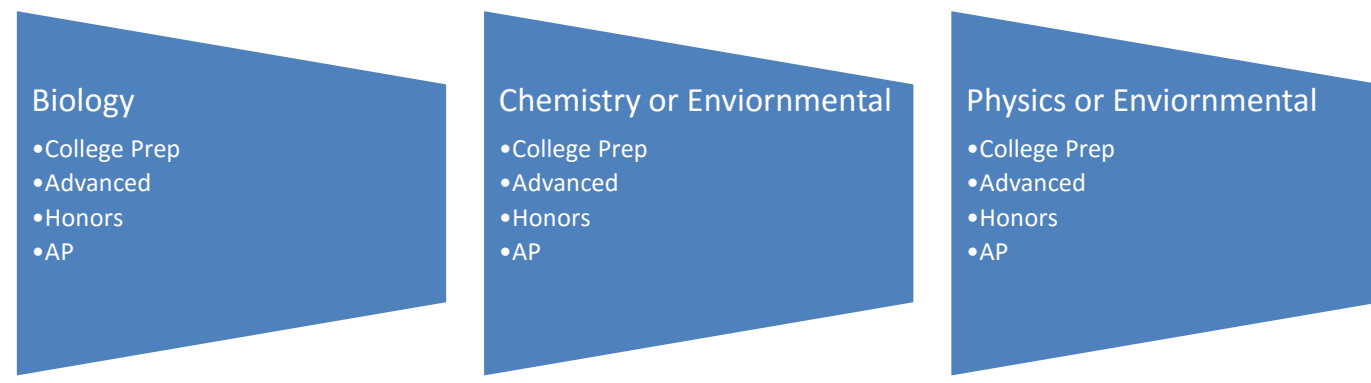

5 credits

Forensic science is the application of science to the law and encompasses various scientific disciplines. This course will introduce various methodologies and applications used in the forensic context. Topics discussed include organic and inorganic chemical analyses of physical evidence, principles of serology and DNA analysis, identification of fresh and decomposed human remains, ballistics, fingerprint analysis, facial reconstruction, drug analysis, and forensic entomology.

COMPREHENSIVE MEDICAL TERMINOLOGY

5 credits

Study of English meanings of common basic words and phrases used in the medical field. Includes spelling, prefixes, suffixes, word roots, derivations and usage, and the meanings of common words and phrases. Supplemental topics: pathological conditions, diagnostic procedures, documentation, life span considerations, pathogenesis, and nutrition.

SOCIAL STUDIES

GRADUATION REQUIREMENTS:

Three Years

TYPICAL SEQUENCE

9 World History 10 US History 1 11 US History 2

WORLD HISTORY

5 credits

World History is a required, year long course usually studied by freshmen. The focus of this course is the historical, sociological, political and economic development of Modern World History from the 1400's to the present day. The following World History periods are included: Emergence of the Modern World, The Age of Revolutions, Industry and Nationalism, and World in Conflict.

U.S. HISTORY I

5 credits

U.S. History I is a required, year long course usually studied by sophomores. The focus of this course is the historical, sociological, political and economic development of the United States from the pre-colonial era to the close of the nineteenth century.

U. S. HISTORY II

5 credits

US History II is a required, year long course usually studied by juniors. The focus of this course is the historical, sociological, political and economic development of the United States, from the turn of the twentieth century to date.

AP AMERICAN HISTORY

5 credits

Advanced Placement American History is an elective, full year course studied by juniors; however, seniors are also allowed to take the course. This course satisfies the requirement for a second year of American History. The advanced placement program in American History is designed to provide students with the analytic skills and factual knowledge necessary to deal critically with the problems and materials in American History. Students should learn to assess historical materials – their relevance to a given interpretive problem, their reliability, and their importance – and to weigh the evidence and interpretations presented in historical scholarship. An advanced placement American History course develops skills necessary to arrive at conclusions on the basis of an informed judgment and to present ideas clearly and persuasively. As much as possible, the AP course is taught by college format, emphasizing lectures, seminars, and essay examinations. The goal of the course is to prepare students for the Advanced Placement Examination. Therefore, the student will be expected to develop his/her writing skills, advancing beyond the narrative approach to writing to critical analyses of and defensible position papers.

AP AMERICAN GOVERNMENT

5 credits

The course will prepare the students to take the AP examination in U.S. Politics and government. The course will be equivalent to a one semester college course. It is offered to seniors and juniors. The course in U.S. Government and Politics will give the students an analytical perspective on government and politics in the United States. The course will involve the study of general concepts of American government and specific case studies. It will familiarize the students with the various institutions, groups, beliefs, and ideas that constitute American political reality.

This course will require the reading of a comprehensive text book on the level of an introductory college course. In addition to the text book, students will be required to read a supplemental collection of interpretive readings and several shorter books on specific topics. The course will combine the lecture/discussion format, with about one-half of the class time devoted to formal presentations, and the remainder of class time spent on class discussions of readings and lectures as well as seminars in which the students will make presentations and lead discussion.

AFRO-AMERICAN HISTORY

2.5 credits

Afro-American History is an elective, half-year course, usually studied by juniors and seniors. Assignments and class activities will be adapted to individual student levels of ability and learning. The adaptation will be to cover the spectrum of students who may choose to take the class. It examines the impact of black Americans on American History. The course provides insights into the roots of prejudice and discrimination while also highlighting the contributions of Black Americans to our progress as a nation.

HISTORY OF BEHAVIORAL SCIENCE

2.5 credits

History of Behavioral Science is an elective, half-year course offered to juniors and seniors. The course traces the development of various theories from the following areas: Intelligence and Thinking, Memory, Development, Abnormal Behavior and Personality.

AP HISTORY OF BEHAVIORAL SCIENCE

5 credits

This course will allow students to make an in-depth, systematic and scientific study of the behavior and mental processes of human beings. During the course students will be exposed to the facts, principles, concepts, and phenomena of all of the major areas of Psychology, including methodology. The course will provide a much more detailed study of psychology than our regular psychology class, and provide the increased time needed for an in-depth study.

This course has three main goals. First, to give students an opportunity to gain in-depth knowledge of a subject that is interesting, relevant to today's society, and increasingly important. Secondly, not only will AP Psychology prepare our students to take and pass the AP Examination in psychology, but by offering it to 11th & 12th grade students, we will be able to increase the number of AP courses that students can schedule during their high school years and increase the flexibility in scheduling. Last, and certainly not least, by offering a "high interest" subject such as psychology, students who might not ordinarily consider taking an Advanced Placement class will accept this academic challenge.

HOLOCAUST AND GENOCIDE STUDIES

2.5 credits

This course will concentrate on the causes, events, and effects of the Holocaust (1932-1945). Jewish culture, anti-Semitism, the Nazi rise to power will be areas included in background study within the course. The course will include readings, discussions, class activities, films and projects. Assignments and class activities will be adapted to individual student levels of ability and learning. The adaptation will be to cover the spectrum of students which may choose to take the class.

LAW

2.5 credits

Law is an elective half-year course, usually studied by juniors and seniors. This course surveys the development and operation of the American legal system. In this course, the student will focus upon the laws and decisions focusing on both Constitutional Laws and Civil Rights.

SOCIOLOGY

2.5 credits

Sociology is an elective, half-year course usually studied by juniors and seniors. It is designed to introduce students to the study of human relationships. The scientific method of research is taught and tested using a group-prepared survey technique. Social institutions, cultural phenomena and contemporary social problems are emphasized. This course is designed as an introduction to sociology and would most appeal to the college-bound student.

FINE ARTS

ART FOUNDATION I

Grades 9-12

5 credits

This is an entry level course for the High School Visual Arts Curriculum. It is designed to provide an overview of Visual Arts while studying a broad variety of art tools and materials. With an emphasis on studio production, this course is designed to develop higher level thinking, art related technology skills, art history, and aesthetics.

ART FOUNDATION II

Grades 10-12

5 credits

Prerequisite: Successful completion of Art Foundation I.

This is an entry level course for students who have successfully completed Art Foundations I. It is designed to provide an overview of Visual Arts while studying a broad variety of art tools and materials. With an emphasis on studio production, this course is designed to develop higher level thinking, art related technology skills, art history, and aesthetics.

STUDIO SEMINAR

5 credits

Prerequisite: Successful completion of Art Foundation II, by interview, art teacher recommendation or assessment.

This year-long course is designed for the student art major who has a solid foundation in the fundamentals of drawing and composition. This is a survey course, covering a variety of techniques and media, including printmaking, collage, ceramics, drawing, painting and sculpture. Drawing from observation is emphasized throughout the year. A variety of topics in art history and art criticism are also explored. This course is designed for students who wish to develop and compile a portfolio for college admissions, career placement, and/or scholarship applications.

3 DIMENSIONAL DESIGN

5 credits

This art course deals with art in its 3-Dimensional form. A variety of mediums will be explored, which may include textiles, clay, paper mache', wire sculpture...and more! Students will participate in a wide range of experiences using additive or subtractive sculptural techniques designed to build artistic and creative confidence. An appreciation for art from various cultures will also be developed. Projects are designed to teach thinking skills and to include useful Art experiences such as color theory and design, so that no matter what vocation students pursue, the knowledge gained in this class will be of value to them

MUSIC

ADVANCED CHOIR

5 credits

Advanced Choir is a performance oriented full-year course. Enrollment is by **audition only** and is open to students in grades 9 through 12. Participation in classroom rehearsals and individual skill level improvement is the major basis for grading. Students are required to participate in concert performances.

MUSIC THEORY

5 credits

Music Theory is a course in which the basic fundamentals of music notation are identified. These will include the Grand Staff, clef signs, line and space names, note and rest values, time and key signatures, and major scale construction. Fundamentals of music notation (Theory I) is a prerequisite to the study of basic harmony. The construction of Triads, Chords and their progressions and cadences is studied as a foundation for basic harmony.

PIANO

5 credits

This course introduces beginners to basic piano study, as well as provides no-cost lessons to students with previous keyboard skills. Students will learn musical notations, historical repertoire relevance and musicality, playing individual instruments in a classroom setting. Accomplished students will hone their skills, as well as expand their repertoire, perform dual-piano pieces, develop their accompanying skills, and reinforce the rudiments of basic music theory. The instructor will work with students on a one-to-one basis, documenting progress and development weekly. Students would be eligible for enrollment in class piano multiple years, as there is no end to musical development and knowledge

THEATRE SURVEY

5 credits

This elective course is designed as a first year exploratory theatre course. Theatre Survey will expose students to the performance, technical, and literary aspects of Theatre Arts. The performance curriculum will include the various dynamic aspects of the actor in preparation and performance. The technical curriculum will include the practical aspects of planning, designing, constructing, and operating the physical theater. The literary curriculum will include a study of the history of theatre and a reading analysis of the different genre of dramatic literature within that historical context. An ongoing objective of the course will be an awareness and appreciation of good theatre and the desire to continue as an intelligent participant in, or observer of, the oldest form of human creative endeavor.

SYMPHONIC BAND

5 credits

Symphonic Band is a performance oriented full-year in which students will acquire ensemble performance skills, as well as develop an idea of rehearsal technique and how to prepare for concerts understanding the differences between practice and rehearsal. Symphonic wind bands are the core focus of any instrumental music program at the high school level, as it is where the skills needed for marching band, jazz band, chamber ensembles, and solo performance are learned. Students have the option to audition for All-South Jersey, All-State Band*, as well as participate in the Rowan Side by Side Concert and other area honor bands. Attendance is required in class and at any extra rehearsals for concert preparation. Students are required to perform at all concerts (including graduation).

***All-State Band requires acceptance to All-South Jersey Band to gain eligibility.**

BUSINESS AND TECHNOLOGY

The Business/Technology courses offer students an updated curriculum of new technology and methodology. These courses provide valuable skills for success in the Information Age of the 21st century including skills necessary to succeed in the workplace and/or in higher education.

ACCOUNTING I

5 credits

Accounting I is a full-year course, required of all students pursuing a Business Program through high school. It is also an elective for all other students. It gives students a thorough grounding in basic accounting principles and serves as an aid in all other business subjects. The course includes the complete accounting cycle for both a small service and merchandising business. Projects and simulations are used for review, and a final examination is required.

INTRODUCTION TO COMPUTERS

2.5 credits

Personal Information Processing is a half year course designed to provide students with keyboarding and word processing skills necessary for personal and business use. Students will learn to keyboard using the “touch” method and strengthen this skill by

creating many different documents. These documents include: personal and business letters, envelopes, outlines, unbound reports, reference and title pages, tables, and memos.

TECHNICAL LIFE SKILLS

5 credits

Technical Life Skills is an introductory course designed to provide students with a variety of skills necessary for success. Students will gain a better understanding of basic computer skills, career awareness and career path development, money management and interpersonal communication skills.

SPORTS MARKETING AND ENTERTAINMENT

5 credits

The students will learn the foundations of marketing which include advertising, planning, consumer behavior, product research, ethical behavior, and communication. This highly interactive course will enable students to engage their creative side while learning how to market a team, a sports figure, a product/service, and themselves. Students will frequently engage in individual / group activities, creative writing assignments, and exploration of the Web to research popular companies.

BUSINESS LAW

2.5 Credits

This course provides you with an understanding of what our legal system actually is, how it works, its importance in all areas of business, and what it means to you personally. The students do research on a variety of court cases. Areas studied include criminal law, civil law, court and prison systems, and in-depth study of business contracts.

BUSINESS MANAGEMENT

2.5 Credits

Today's students are actively involved in business organizations at all levels. Whether you are an employee, manager, entrepreneur, concerned citizen, or a consumer, involvement in business organizations is numerous and varied. These personal experiences provide a foundation for a meaningful and systematic study of business, organizations, and management. The Business Management course provides a critical understanding of how business organizations work and are managed--their goals, strategies, structures, technologies, environments and the motivations and interests of the people involved. Activities and assessments promote critical thinking and decision-making, while addressing the importance of technology & the global nature of business.

6700 AP COMPUTER SCIENCE

5 credits (Prerequisite: Computer Programming and/or juniors and seniors taking honors level math and science.)

The Advanced Placement computer Science course is a full year course for Juniors and Seniors, intended to serve both as a college introductory course for computer science majors and as a substantial service course of students who will major in the disciplines that require significant involvement with computing.. This AP course encompasses the collection of technical skills and scientific methodologies enabling students to create high-quality computer-based solutions to real problems. The JAVA language is used as the vehicle for implementing computer-based solution; however the language is not the focal point of the course. This class is also dual-credit through ACCC.

AP COMPUTER SCIENCE PRINCIPLES

5 credits

The AP Computer Science Principles (AP CSP) course introduces you to the essential ideas of computer science and shows how computing and technology can influence the world around you. You can pursue your interests in digital projects – like apps, films, games or music – that showcase your creativity, and use your creations to make a difference in your community.

ROBOTICS

5 credits

Course Overview:

Students will be introduced to the world of Physical Computing by developing an understanding how devices interact with our physical world. The course will provide an introduction to electronics, circuits, hardware, and networking, and work toward creating projects that can be operated remotely or autonomously. This is a lab course, which will have a significant portion of the time created to hands-on demonstration of the topics covered.

FINANCIAL LITERACY

2.5 credits

This half-year course is offered to students to assist them in using critical thinking, decision making, and problem solving skills. This course will focus on developing personal living skills. Students will have the opportunity to use software and the Internet to acquire and reinforce skill for “real world” success. This course is designed to meet the state requirement.

TECHNOLOGY EDUCATION I & II

5 credits

These career-oriented courses are designed to include today's and tomorrow's technology. The students will learn basic project planning, engineering, research and development, communications, and graphic technologies. The students will have both hands-on and multi-media activities to develop the recommended skills, competencies and behaviors needed for worker preparedness and proficiency in our technological society.

ENGINEERING DRAWING AND DESIGN I & II

5 credits

We offer a program in Developmental Mechanical Drawing. The courses are sequential and cover a wide variety of methodologies. Each course successfully completed carries a course credit value of 5. In order to receive credit for this course, the student must be able to perform the following activities at a minimal level of proficiency:

1. Perform Mechanical Drawing activities as prescribed by instructor,
2. Gain an awareness of current industry requirements for employment,
3. Show a continual growth pattern of skill development.

JOURNALISTIC TECHNOLOGY

5 credits

This computer-based elective course, offered to students who have successfully completed English I, is designed to explore journalism from all aspects, focusing on the newspaper as a primary form of mass communication. Focus is on skills and techniques that relate to news gathering, news writing and news publishing. Finally, incorporation of all skills learned will be compiled using word processing, desktop publishing and digital photography to create a school publication. This course is designed for the student with an interest in a career in journalism and the student interested in working on a student publication. This course satisfies the New Jersey state requirement for a computer course. Students will be required to spend additional time outside of the normal class period preparing school publications. The journalistic technology elective can be taken in succeeding years. The course proficiencies will be modified to reflect additional years of study.

TELEVISION BROADCASTING & PRODUCTION

5 credits

This elective course is designed to explore broadcasting from all aspects, focusing on the role of broadcasting news, writing, and production. The broadcasting course will focus on skills and techniques that relate to news gathering, news writing in broadcast form, and news reporting. On-going development of skills in reading, writing, speaking, and listening will be emphasized. This course is designed for the student with an interest in a career in broadcasting, as a prerequisite for the student interested in working in a productions studio, or one with a desire to improve writing skills, speaking skills, or oral communication. The production section of the course emphasizes the nature of communication, media literacy, and the historical development of media devices such as books, film, music, newspapers, radio, and television. This section also examines the history of broadcasting along with the legal aspects of a school production studio. The television broadcasting & production elective can be taken in succeeding years. The course proficiencies will be modified to reflect additional years of study.

FAMILY AND CONSUMER SCIENCES 1

5 credits

Family and Consumer Science I is designed as a general introductory course involving sewing and project construction, nutrition, recipe planning, preparation, and service, etiquette, money management and consumerism, parenting, family relations and home management. It is an elective full-year course open to 9th, 10th, 11th, and 12th graders.

FAMILY AND CONSUMER SCIENCES 2

5 credits

Family and Consumer Sciences II is designed to teach advanced skills in the areas of nutrition, food preparation, recipe planning and meal service, textiles, sewing and clothing construction, consumerism, personal development, home management, and human growth and development

ADVANCED FAMILY AND CONSUMER SCIENCES

5 credits

Advanced Family and Consumer Sciences is designed to be taken as a one or two year course following the successful completion of Family and Consumer Sciences I and II. Food preservation, nutrition, food preparation, food service, etiquette, fashion, sewing and clothing construction, housing and furnishings and parenting are studied in detail.

MANUFACTURING I & II

5 credits

Students will learn the principles of manufacturing and production and how these processes impact the world in which we live. The students will brain storm, design, and create products from both natural and synthetic materials as they learn about production from

the planning stage to the marketing stage. These hands-on courses give students the opportunity to learn about various manufacturing systems and make corresponding products within each system.

PHYSICAL EDUCATION

GRADUATION REQUIREMENTS:

Four Years

TYPICAL SEQUENCES

PHYSICAL EDUCATION 9 HEALTH GRADE 10 PHYS ED/HEALTH 11 PHYS ED/HEALTH 12

All students are required to participate in Physical Education for the entire school year. Students may only be excused from participation in these classes by a physician's request. Students not physically participating will be required to complete alternative written assignments.

Both present and future physical and recreational needs of students are met through:

1. Participation in a wide variety of physical activities that will lead to the development of coordination, strength, skills and endurance.
2. Participation in a variety of physical activities having continuing lifetime values.
3. Experiences designed to develop knowledge, understanding and attitudes which result in desirable practices necessary to maintain physical, social, emotional, and mental health.

HEALTH

All students receive one marking period in Health Education each year. This course is divided into 4 units – Family Life, Driver, Education, Personal Health and Adult Living. Any pupil whose parent or guardian presents a signed statement that any part of the instruction is in conflict with his/hers conscience or sincerely held moral or religious beliefs shall be excused from that portion of the instruction. An alternative assignment will be determined by the department supervisor in conjunction with the student.

Starting September 2012, the freshman class will take a full year of physical education and the sophomores will complete a full year of health.

FAMILY LIFE-GRADE 10

This course consists of an in-depth look at Drug Use and Abuse, Death and dying, Cardio-pulmonary Resuscitation, and Family Living (Dating, Pregnancy, Birth control, and STDs). The essential material and culminating facts to understand the basic anatomy and physiology of the human body are reviewed in order to have the student develop a mature outlook. The textbook "Teen Healthy" is used to assist the instructor in presenting the information. Evaluation will be based on notebook, test/quiz, class participation, homework/projects, and final exam.

DRIVERS ED-GRADE 10

The Driver Education Program is a two phase process. The first phase consists of thirty hours of classroom instruction in driver training. The second phase students may elect to participate (at a cost set by the Board of Education) provided they have successfully completed phase I and the State Driving Test. Students shall be scheduled based on age (the oldest is given priority and according to teacher availability, as well as the availability of the car. The textbook "Defensive Driving" will be used along with the State Manual. Evaluation will be based on notebook, test/quiz, class participation, homework/project, and final exam.

PERSONAL HEALTH-GRADE 10

This course is designed to increase the students' level of personal health. Accurate and up-to-date information will be given in the areas of drug education, mental health, and community health. The textbook "Health A Wellness Approach" is used to assist the instructor in presenting this information. Evaluation will be based on test/quiz, class participation, homework, projects, and final exam.

ADULT LIVING-GRADE 10

This course gives the student an in-depth look at family living/personal relations, drug and alcohol education, health careers, and community health. It is designed to increase the level of personal health, produce the most accurate and up-to-date information that will enable students to make decisions regarding health and adult living that is best for them and their environment, and provide knowledge that will affect attitudes and lead to positive changes in the modification of the student's behavior. Evaluation will be based on test/quiz, class participation, homework/projects, and final exam.

EVERYDAY LIFE

5 credits

This course offers special class programming for students with intensive educational needs. Unless otherwise specified in the IEP, instruction in the core curriculum content standards is provided with the objective of helping students master the functional skills necessary for independent living.

NCAA INITIAL ELIGIBILITY REQUIREMENTS

<http://web.ncaa.org/eligibilitycenter/common>

ATTENTION: All prospective student-athletes who want to play NCAA Division I or II intercollegiate athletics must be certified by the NCAA Eligibility Center to be eligible to play.

It is each student's responsibility to check online for all regulations and for updates. The eligibility center may be accessed at http://web1.ncaa.org/ECWR2/NCAA_EMS/NCAA.html. This comprehensive site provides all the information resources needed to initiate the application process. Specific information regarding eligibility may be accessed by contacting the eligibility center staff at (877) 262-1492.

To be certified by the Eligibility Center, a student must: Graduate from high school and an application for certification must be completed and submitted after the Junior year. The NCAA Eligibility Center will issue a preliminary certification report when all materials have been submitted. Following graduation from high school, the NCAA Eligibility Center will review the final high school transcript and will make a final certification decision according to NCAA standards.

Division I

If you enroll in Division I college, in order to qualify to participate in athletics or receive an athletic scholarship, you must graduate high school having completed these 16 College Prep Level core courses:

If you have questions about NCAA eligibility, please call the NCAA eligibility center toll free at 877-262-1492. You may also call the NCAA at 317-917-6222.

Middle Township High School Academy Programs

Middle Township High School is proud to launch academy programs in multiple fields, designed to allow students to excel in a specific content area of their interest. Our mission is to prepare students for college and a career through a focused course of study, work and practicum experience, as well as association with national organizations.

In the 2017-2018 school year, Middle Township High School will offer academy programs in the following areas:

Academy of Business

The Academy of Business introduces students to careers in the business field and prepares them for college courses. Within this academy, students will have the opportunity to work with professionals in the field, as well as earn college credits for specific courses. This academy gives students an advantage when seeking immediate employment in the business field, as well as in their coursework progression at the university level. Our course offerings include marketing, accounting, business law, business management and economics. In addition, students will complete requisite internship hours in the business field to broaden their understanding of their chosen area of study.

Academy of Computer Science (STEM)

The Academy of Computer Science serves to expose students to careers in the computer science and engineering fields and prepare them for college courses. Within this academy, students will have the opportunity to work with professionals in the field as well as earn college credits for specific courses. This academy will give students an advantage when seeking immediate employment in the technology field as well as their coursework progression at the university level. Our course offering includes computer systems, computer programming, AP Computer Science, AP Computer Principles and robotics. In addition, students will complete requisite internship hours in the computer science or engineering fields, or complete a culminating project by the end of their senior year to broaden their understanding of their chosen area of study.

Academy of Medicine and Health

The Academy of Medicine and Health offers students exposure to careers in the medical field and prepares them for college courses. Students will have the opportunity to work with professionals in the medical and healthcare fields, as well as earn college credits for specific courses. The Academy of Medicine and Health gives students an advantage when seeking immediate employment in the healthcare field, as well as in their coursework progression at the university level. Course offerings include forensics, anatomy and physiology, medical terminology, Health Occupation Students of America (HOSA) and nutrition.

Academy of Performing Arts

The Academy of Performing Arts at Middle Township High School offers programs of study in five disciplines: dance, instrumental music, media/communications, theatre, and vocal music. Following a successful audition into their selected program, students will complete a course of study that will prepare them for a college audition in their field.

Dance Major: The Dance Major is a four-year program focused on Dance Technique, Dance History, and Kinesiology with a concentration on performance and choreography. Ballet and Modern dance techniques will serve as the foundation of the dance major.

Instrumental Major: Instrumental Music Majors will focus not only on mastering their instrument of choice, but understanding the music theory, history, and performance practice that is associated with a career and study of that musical instrument.

Media/Communication Studies Major: Students in Media/Communication Studies will gain a solid education, highlighting media studies, as well as human, social, and educational communication. Students will study the history, evolution, and changing state of mass media, television production, and American Media Studies, including ethics, legality, and the economic and social effects of media.

Theatre Major: Students in the Theatre Studies Major will learn through the practice and commitment of a high level theatre program. Our curriculum combines academic courses in dramatic literature and theatre arts, emphasizing both the practical and theoretical aspects of theatre performance, dramatic literature, theatre history, dramaturgy, and stagecraft.

Voice Major: Vocal Music Majors will focus on developing their voices, as well as acquiring a repertoire list representing multiple foreign languages, genres, and styles. In addition, students will study music history, music theory, sight singing, and aural skills/dictation. Students will be offered opportunities to perform throughout the school year in various venues.

Middle Township High School is dedicated to providing our students with, not only a comprehensive high school education, but focused courses of study that set them apart from other students applying to college and entering the work force. Our administration, faculty, and staff are excited to offer this opportunity to our current and incoming students.
